Please do not allow the NAB, through petition 04-160, to censor or restrict what we are allowed to receive in terms of content on our Paid satellite radio service. We are paying for this service, and XM is allowing me as a small business person to run my business and feed my family by installing them on motorcycles, boats and cars. Don't allow lobbyists to drive good, innovative businesses out of business. Where's the public outcry, if there's an issue? Please don't give the impression the FCC only listens to lobbying groups and not to the paying public.
